SONAR TECHNOLOGY

PANOPTIX LIVESCOPE™

The award-winning Panoptix LiveScope System is the most amazing sonar technology ever. We took scanning sonar and brought it to life in real time. It shows highly detailed, easy-to-interpret live scanning sonar images of structure, bait and fish swimming below and around your boat in real time, even when your boat is stationary. Images are so clear and precise that, with a little practice, you might be able to identify species!

TWO MODES IN ONE TRANSDUCER

PANOPTIX LIVESCOPE DOWN

Live, easy-to-interpret scanning sonar images of structure and swimming fish in incredible detail below your boat – up to 200'.

PANOPTIX LIVESCOPE FORWARD

An excellent tool for scouting and fishing out ahead of your cast, it can show real-time scanning sonar images of structure and fish swimming all around your boat – up to 200'.

PANOPTIX LIVESCOPE SCANNING SONAR SYSTEM

Includes a compact GLS 10 sonar black box with LVS32 transducer and simple plug-and-play Garmin Marine Network connector to install easily and integrate seamlessly with your compatible Garmin chartplotter¹. Use the transducer as a supplemental traditional and ClearVü sonar source to see a historical representation of structure and fish below your boat. Available with trolling motor and transom mount transducer options.

¹Compatible with GPSMAP® 8400/8600, GPSMAP 7400/7600, 1002/1202, GPSMAP 1202/1202xsv Touch and 702/902 series chartplotters and ECHOMAP™ Plus 70cv/70sv and 90sv chartplotter/sonar combo series

PANOPTIX™ ALL-SEEING SONAR

Provides a live sonar look at fish swimming and moving toward or away from the boat. Cast right at fish. See your lure. See fish react to your lure. See and feel the strike.

REALVÜ 3D FORWARD

Scans the area in front of your boat, creating a forward-looking 3-D view of the bottom, structure and fish¹.

FRONTVÜ

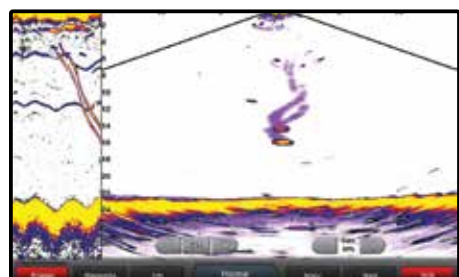

To help give you time to avoid collisions² with submerged obstacles, FrontVü shows underwater obstructions within a 300' range as you approach them in real time.

PANOPTIX DOWN

Includes 3 downward views: LiveVü Down, RealVü 3-D Historical and RealVü 3-D Down.

LIVEVÜ DOWN

Shows real-time moving sonar images of small baitfish and large target fish swimming below your boat and pinpoints their distance left or right and their depths.

REALVÜ 3-D HISTORICAL

Scrolls through sonar data as the boat moves to show the history of the entire water column from the bottom to the surface and all the fish in between.

REALVÜ 3-D DOWN

Scans below the boat – front to back and side to side – to construct a full 3-D view of the area under the boat, letting you see contour changes, fish and structure, even while stationary.

ULTRA HIGH-DEFINITION

CHIRP SONAR

The Ultra High-Definition Scanning Sonar System redefines scanning sonar. See everything below and off to the sides of your boat in amazingly sharp, crisp detail. Share Ultra High-Definition scanning sonar images seamlessly across multiple networked chartplotters. You can also add optional Panoptix™ all-seeing sonar to your networked sonars. The system includes an easy-to-install, networking GCV 20 sonar black box with an included three-array GT34UHD transducer to provide scanning sonar images in ultra high-definition.

ULTRA HIGH-DEFINITION CLEARVÜ

This sonar system provides brilliant image clarity of structure and fish below your boat at greater depths than other high-frequency scanning sonars by utilizing a downward-facing element to put more power on targets.

ULTRA HIGH-DEFINITION SIDEVÜ

See stunningly clear images of structure and fish off to the sides of your boat. This makes it easy to scout a fishing area quickly because you can see everything the first time with clarity.

TRADITIONAL CHIRP SONAR

Garmin CHIRP traditional sonar sends a continuous sweep of frequencies ranging from low to high. This sweep of frequencies provides a wide range of data to create an amazingly clear, high-resolution image.

CHIRP CLEARVÜ

ClearVü with CHIRP technology is high-frequency sonar that delivers an amazingly clear picture of what's under your boat. ClearVü produces an ultra-clear image for a more detailed representation of objects, structure and fish.

CHIRP SIDEVÜ

SideVü with CHIRP technology provides a highly detailed, high-resolution image of structure and fish off to either side of your boat. It's excellent for scouting, finding fish and the right types of structures for successful fishing.

An aerial photograph of a vast, deep blue body of water, likely a large lake or bay. The water is dotted with numerous small, rocky islands and peninsulas. In the foreground, a white boat is moving from left to right, leaving a long, white wake behind it. The sky is a pale, hazy blue, suggesting a clear day. The overall scene is serene and expansive.

9-AXIS HEADING SENSOR

Part no: 010-11417-20

Our premium solution for exceptional heading accuracy allows for MARPA tracking and improves the radar overlay experience.

With heading output at 10 Hz and accuracy of plus or minus 2 degrees, it ensures your chart orientation and boat heading line match up with reality, even at lower speeds. Your heading information will remain accurate, even in rough sea conditions where your bow is pitching and rolling or – in sailboat applications – when heeled over.

The 9-axis MEMS technology allows installation in nearly any orientation located away from magnetic interference. It's built to withstand bilge environments.
